Important News from Cumberland Gap-Heported Surrender of Pulon General Morgan.

(From the Richmond Isspatch, Sept. 2.) If correct, the news from Cumberland Gap is scarcely less important than that from Manassas. Late last night it was asserted that news had been received in official quarters to the effect that the Yan-official quarters the effect that the effect that eral Morgan had attempted to cut his way through our lines, and that he was repulsed with great slaughter, after which his entire command, amounting to some 10,000 men, with their arms and equip-ments, surrendered to our force under General E. Kirby Smith. There is every reason to believe this statement is correct, as it is well known that Morgan's position was decidedly precarious; but in view of the many similar reports received from the same quarter it should be taken with ch caution.

Breadstuffs to be Free of Duty PROM WASHINGTON. Washington, September 12. The following dispatch has been received

at the State Department: LEGATION OF THE UNITER STATES, LISBON, August 12, 1862. Siz-I have the honor to enclose here with a copy of a decree, in translation, just issued by his Majesty's Government, admitting foreign breadstuffs in the ports of his kingdon free from the usual and established duty. It is exceptional to acts of the Cortes and decrees in former years of scarcity, inasmuch as flour is now included

in the free list, which, except in rare in-stances, was confined to grain exclusively. The answers to official inquiries about rops rendered this step necessary at once, and without waiting for authority from the Cortes, which will legalize the decree upon assembling. My previous dispatch-es on this subject have necessarily led you to expect some such intelligence. It is de-sirable for the interests of agriculture and Congress that publicity should be given to this information in an authentic form, in order that whatever advantage may proeed from it may be enjoyed equally by

It may also be stated in this connection that the belief exists in well-informed circles that the supply of cereals in Europe will be more limited than has been expeced, and the demand for American product espondingly greater.
